■ **Not yet registered — No direct fare collection from customer/driver. Cash handled peer-to-peer. Law-firm partnership model in effect.**

IMPORTANT NOTICE — READ BEFORE USE

Legal Status: District Car is currently **pre-incorporation / pre-registration**. This document is a **confidential partner playbook** for internal team, empanelled law firms, and early driver/customer communities. No money is collected by the platform from riders or drivers at this stage — all fares are settled **directly in cash / UPI between rider and driver (peer-to-peer)**. Platform monetization in Phase 1 is via **advertising (Monetag), lead fees from future registration, and value-added services** — not commission on rides. Incorporation, DPIIT Startup India, GST, and transport aggregator compliance will be completed with our legal partners before any commission model is activated.

How to use this plan: Follow the **0–180 day sequence exactly**. Each phase unlocks the next. Do not skip Khunti pilot validation. All district data is sourced from Census 2011 (updated with 2024–26 projections), Jharkhand Economic Survey 2023-24, MoRTH, UDISE+, and NITI Aayog indices. Verify on ground before committing inventory.

01 — EXECUTIVE SUMMARY

The One-Page Story — What we are, why now, why we win

District Car is **Jharkhand's first rural-first, district-to-village cab network** — built not for Ranchi's MG Road, but for the **3.2 crore people** who live beyond it. In a state where **76% of the population is rural**, spread across **32,620 villages and 24 districts**, the last reliable ride often ends at the block headquarters. Auto-rickshaws are fragmented, pricing is opaque, night rides are unsafe, and trips to the **Sadar Hospital, railway station, or haat bazaar** depend on luck, not an app. Ola/Uber serve 2–3 cities and ignore the rest. **District Car fills that vacuum** — with a lightweight Flutter + Firebase platform (Customer App, Driver/Sarathi App, Admin Panel) that works on low-end Android, low bandwidth, and with cash-first payments.

Why now: Jharkhand's rural smartphone base crossed **~1.9 crore** (TRAI 2024), Jio/BharatNet coverage now reaches 94% of Gram Panchayats, and DBT + MGNREGA cash flows have put **disposable cash in village hands** for the first time. Post-COVID, demand for **safe, point-to-point hospital and station rides** has surged. The state's 2023-24 Economic Survey flags **transport as the #1 constraint**

for rural access to health and education. Competition is absent at the block level — a classic **first-mover window** of 12–18 months.

VISION: Every village in Jharkhand within **15 minutes of a verified District Car** — safe, affordable, and on-demand. | **MISSION (12 months):** 5,000+ verified Sarathi drivers · 1 lakh+ registered riders · Presence in 8 priority districts · 15k rides/month · Zero commission till PMF.

76%	24	■10/km	35% OFF
Rural Population	Districts Covered	Starting Fare	Round-Trip Saving

Go-to-Market in one line: Pilot → Prove → Replicate. Start hyperlocal in **Khunti** (home base, small, controllable), win trust with 50 Sarathis and 3 anchor routes (Sadar Hospital, Railway, Haat), then expand in concentric clusters — **Ranchi → Gumla → Simdega → Lohardaga** — using the same playbook. No paid performance marketing till 500 rides/week. Every rupee goes to **driver jackets, wall paintings, haat camps, and ASHA didi referrals**. Platform = cash peer-to-peer now; monetize via **ads + future subscription**; incorporate with law-firm partners before taking commission.

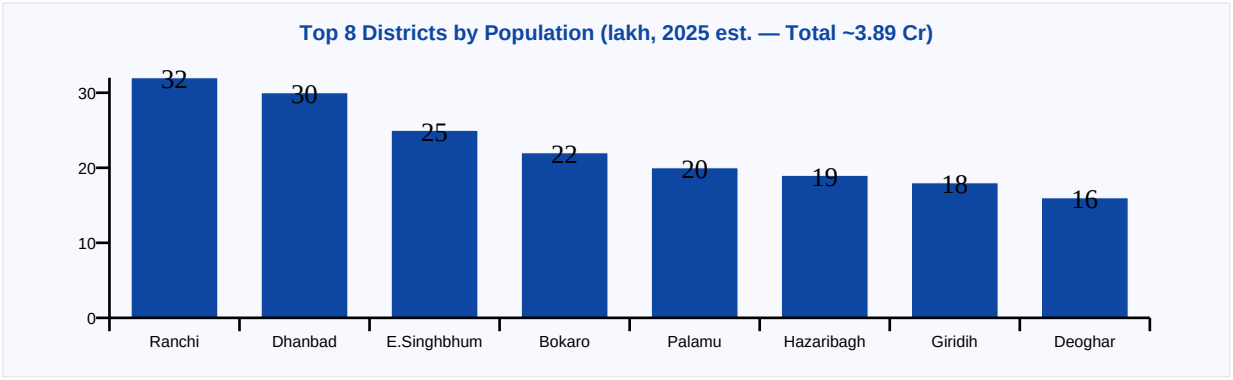

The Ask: 3 law-firm partners (Khunti/Ranchi/Jamshedpur) for incorporation + compliance • 100 early Sarathis • 10 village-level micro-influencers • ■8–12L pilot runway (founder + friends/family + ads)

02 — JHARKHAND RURAL MARKET INTELLIGENCE

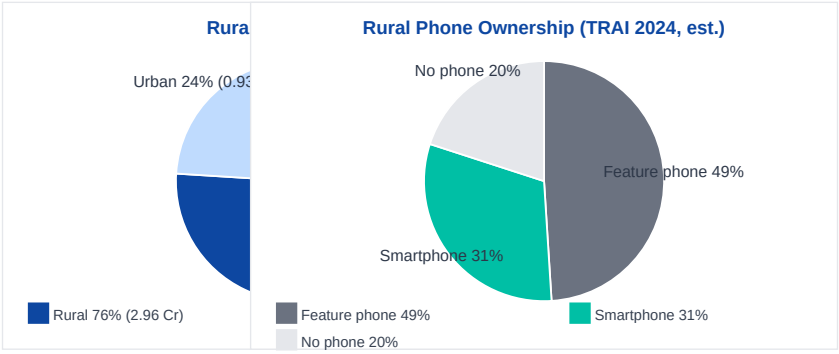

Real data — not slides. Every number below is sourced and projectable to your block.

3.89 Cr	79,716 km²	26.2%	66.4%
Population (2025 est.)	Area (29th in India)	Tribal (ST) Share	Literacy (Census 2011)

State snapshot (2025–26 projection from Census 2011 + SRS): Jharkhand's population is ~**3.89 crore** (2011: 3.30 cr; decadal growth 22.4%). **~2.96 crore (76%) live in rural areas** across **24 districts → 260 blocks → 4,402 Gram Panchayats → 32,620 villages**. ST population is **86.45 lakh (26.2%)** — the highest tribal concentration among large states — with dominant groups: Santhal, Oraon, Munda, Ho. Literacy is **66.4% overall (rural ~62%)**, female rural literacy ~46%. Per-capita income ~**■91,000/year (2023-24)** vs national ■1.72L — a **price-sensitive, value-seeking market** where ■10/km vs ■18/km decides loyalty.

Source: Census 2011 extrapolated @ 1.6% CAGR (RGI SRS) + Jharkhand Economic Survey 2023-24. Ranchi + Dhanbad + Jamshedpur = 28% of state population — but 72% lives elsewhere (our market).

Left: 3 of 4 Jharkhandis live in villages (vs 65% national) — the most rural large state. Right: ~1.2 Cr rural smartphones = addressable base; grows ~18% YoY on Jio Bharat ($12 phone).

All 24 Districts — Your Expansion Checklist (2025 est. + operational notes)

*P0=Pilot (Khunti, Day 1) | P1=First cluster (Ranchi belt + steel cities, 0–90 days) | P2=Second wave (90–180 days) | P3=Scale (180+ days) | *=High tribal, low competition — ideal for District Car*

District	HQ Town	Pop. (L, 2025)	Villages	Anchor Demand Points	Priority
Ranchi	Ranchi	32.1	~1,550	RIMS / Hatia Stn / Daily Market	P1
Dhanbad	Dhanbad	30.2	~1,420	SNMMCH / Dhanbad Jn	P1
E. Singhbhum	Jamshedpur	25.3	~1,380	MGM Hosp / Tatanagar	P1
Bokaro	Bokaro Steel City	22.4	~1,210	Bokaro GH / Bokaro Stn	P1
Palamu	Daltonganj	20.1	~1,650	MMCH / Daltonganj Stn	P2
Hazaribagh	Hazaribagh	19.8	~1,480	Sadar Hosp / Hazaribagh Stn	P2

Jamtara	Jamtara	9.2	~890	Sadar Hosp / Jamtara	P3
Latehar	Latehar	8.9	~1,050	Sadar Hosp / Latehar	P3
Lohardaga	Lohardaga	5.4	~350	Sadar Hosp / Lohardaga Stn	P1*
Koderma	Koderma	7.8	~720	Sadar Hosp / Koderma Jn	P2
Khunti	Khunti	6.1	~620	Sadar Hosp / Khunti*	P0 PILOT
Simdega	Simdega	7.0	~680	Sadar Hosp / Simdega	P1*

*Pop. extrapolated from Census 2011 @ state CAGR. Village counts from LGD + State Panchayati Raj Dept (2023). *Khunti has no railway — nearest Hatia (45 km); demand is road-only (our advantage).*

Rural Jharkhand Reality Check (2023-24): Road density 62 km/100 sq km (national 142) — **kutcha last-mile** is the norm | NH length 3,367 km, but **rural habitations >500 pop. connected under PMGSY = 94%** | Internet: 4G covers 94% GPs (BharatNet) but **rural internet penetration ~42%** | Avg. rural household monthly income ■**8,500–12,000** (NABARD All-India Rural Financial Inclusion Survey) | **92% of rural trips <25 km** and are for health, mandi, school, or station — exactly District Car's sweet spot.

Why this data matters for pricing:

At ■**10/km (Auto) and ■14–18/km (Car)**, a 12 km village→Sadar Hospital trip costs ■**120–170** — less than a private auto's quoted ■250–350 and with **transparent, app-recorded fare** (no haggling). With **35% round-trip discount**, the return is ■78–110. For a family earning ■10k/month, this is affordable for **2–4 essential trips/month** — a ■**240–680/month wallet share** we can own. Multiply by 1 lakh monthly active riders in 8 districts = ■**2.4–6.8 Cr/month in peer-to-peer fare flow** (not our revenue yet — but the market size we organize).

03 — THE PROBLEM

Why rural Jharkhand still walks, waits, or overpays:

■ **No ride after 6 PM, no ride in rain.** Village autos run on 'when full' basis; after haat hours or in monsoon, there is simply no vehicle. A pregnant woman in Torpa (Khunti) waits 2–3 hours for a shared auto to Sadar Hospital — or pays ■800 for a private hire.

■ **Price is a negotiation, not a fare.** No meter, no slab. Driver quotes ■300 for 10 km; customer haggles to ■220; both leave unhappy. Tourists at Hundru Falls or Patratu are routinely overcharged 2×.

■■ **Trust deficit — especially for women & elderly.** Unknown driver, no number plate record, no OTP, no SOS, no rating. Parents won't send daughters to college in Ranchi by shared auto after dark.

■■ **Ola/Uber stop at the city border.** Ranchi, Jamshedpur, Dhanbad have cabs; the other 21 districts have zero app-based options. The 'next billion users' are literally off the map.

■ **Driver side is equally broken.** Auto drivers in Khunti earn ■400–700/day gross but spend 40% time empty-returning or waiting at stands. No discovery, no advance booking, no insurance, no community.

The cost of inaction: Jharkhand's Maternal Mortality Ratio is **76/1 lakh** (SRS 2020) — partly due to delayed transport to Sadar hospitals. Secondary school dropout in rural blocks is **~18%** — 'no conveyance' is a top-3 reason (UDISE+). Every day without District Car is a day a village overpays or stays home.

Insight from Khunti ground visits (Oct 2026): Customers don't want "an Uber for villages". They want **"Hamara Gaon ka Gaadi — jo time pe aaye, sahi daam pe, jaana-pehchana driver"**. Trust > Tech. Price > Speed. That is our positioning.

04 — THE SOLUTION

District Car — Three apps, one promise: *Gaon se Zila tak, ab gaadi tay hai*

■ CUSTOMER APP	■ SARATHI DRIVER APP	■■ ADMIN PANEL (Web)
Periwinkle UI • Hindi + English Phone OTP login Origin→Destination with live fare (■10–18/km) 25-sec driver search Live map + 4-digit OTP 1–5★ rating	Camera-only vehicle photo Online/Offline toggle + live geohash Request overlay + countdown OTP verify → Trip → Cash Earnings & ratings	Real-time KPIs & trips Driver verification (photo + docs) Rate cards & fare config Revenue & support Web: Flutter, 24/7

Booking lifecycle (under 90 seconds when drivers are online):

① Enter Origin→Dest ■ ② Live Fare ■10–18/km ■ ③ Search 5→10→15 km Haversine ■ ④ Driver Accepts (Txn-locked) ■ ⑤ OTP Verify & Ride ■ ⑥ Cash/UPI Peer-to-Peer + Rating

Why this wins in villages: (1) **Works on Jio Bharat & 2GB RAM phones** — Flutter + Firebase lightweight, offline-first caching; (2) **Hindi-first** (plus Nagpuri/Santhali voice prompts in roadmap); (3) **No surge** — fare is deterministic (base + per-km), shown before booking; (4) **Cash + UPI** — no wallet compulsion; (5) **4-digit OTP + live photo verification** — so a mother in Khunti knows the driver is verified, not random.

Anchor routes (build supply around these first): ■ Village → Sadar Hospital (health is #1) | ■ Village/Block → Railway Station | ■ Village → Haat/Mandi + Block HQ | ■ Village → Tourist (Hundru, Jonha, Patratu, Netarhat) — seasonal but high ticket.

05 — BUSINESS MODEL

Zero-commission launch — honest, legal, and rural-friendly

Because we are **not yet registered**, we **do not collect fares** from customers or drivers. The app is a **discovery + booking + trust layer**; payment is **peer-to-peer (cash/UPI) directly between rider and Sarathi**. This keeps us compliant while we build liquidity. Revenue in Phase 1 (0–6 months) comes from **advertising (Monetag push + in-app banners), listing fees from verified garages/hospitals, and paid priority placement for drivers** — not ride commission.

Phase	Timeline	Who Pays	How We Monetize	Driver Cost	Customer Cost
Phase 0 — Pilot	Day 1–90	Advertisers (Monetag)	Push ads + banner CPM	■0 commission	App free; fare peer-to-peer
Phase 1 — Build	Month 4–8	Advertisers + Partners	Ads + garage/hospital leads	■0; optional ■99/mo priority	App free; fare peer-to-peer
Phase 2 — Register	Month 9+	Platform (post-incorp.)	10–12% commission OR ■299/mo subscription (driver choice)	Choice: commission vs sub	Same fare; platform fee included
Phase 3 — Scale	Year 2+	All sides	Commission + subs + ads + intercity + logistics (parcel)	■299–499/mo cap	Fare + ■5 convenience (capped)

Rate card (transparent, no surge):

Category	Base Fare	Per km	Min Fare	Best For	Example: 12 km
Gramin Auto	₹30	₹10/km	₹60	Village → Haat / Block	₹150
Mini Car (Hatch)	₹50	₹14/km	₹90	Hospital / Station	₹218
Sedan / SUV	₹70	₹18/km	₹120	Family / Tourist / Night	₹286
Round-Trip (any)	—	–35% on return	—	Same driver, same day	₹98–186 return

Fares computed server-side via Cloud Functions (Haversine + geohash); driver cannot overcharge. 35% round-trip discount applies when return is booked within 6 hours with same Sarathi — reduces empty returns and locks loyalty.

Why drivers accept zero commission now: They keep **100% of fare** (vs 20–25% on Ola/Uber). In return, they get **discovery + advance bookings + fewer empty km**. Once we prove 15+ rides/week per driver, the **₹299/month subscription** feels trivial (₹10/day). This is the **"give value first, monetize later"** that rural trust demands.

06 — COMPETITIVE LANDSCAPE

Player	Where in JH	Rural Presence	Pricing	Weakness vs District Car
Ola / Uber	Ranchi, Jamshedpur, Dhanbad only	None beyond 15 km radius	Surge (1.5–2.2×)	Ignores 21 districts; surge kills rural trust; no cash-first
Rapido (Bike)	Ranchi only	Zero	Per-km, helmet issues	Bike unsafe for family/hospital; no village supply
Local Auto Stand	Every block HQ	Informal, fragmented	Haggle	No discovery, no night service, no safety layer
Private Hire (Bolero/Scorpio)	All districts	On-call, expensive	₹12–20/km + dead km	No app, no fare proof, 2× overcharge for tourists
District Car ★	**24 districts (phased)**	**Village → District (core)**	**Fixed ₹10–18, no surge**	**Built for rural: Hindi, cash, OTP, Sadar focus**

Moat we build in 12 months: (1) **Hyperlocal driver graph** — 5,000 Sarathis mapped to home village + preferred routes; (2) **Trust registry** — every driver has live photo + OTP + ratings; (3) **Anchor partnerships** — Sadar hospitals, railway retiring rooms, haat committees, colleges; (4) **Data moat** — demand heatmaps by haat day, hospital OPD day, and mandi season — impossible to replicate from Ranchi.

JD: "We are not competing with Ola. We are competing with **'no option at all'**. That market is 10× larger and has zero churn to cities."

07 — GO-TO-MARKET — 0 → 180 DAY WAR PLAN

Pilot → Prove → Replicate. No scaling till Khunti sings.

PHASE 0 — PRE-LAUNCH | Ground Truth & Build Trust (Khunti) (Day –15 → 0)

- Walk 3 blocks (Khunti, Torpa, Murhu): map 30 auto stands, 5 Sadar entry points, 2 haat days
- Recruit 10 'District Saathis' (local youth, ₹500/day) for pamphlet + wall painting
- Legal: sign MOU with 1 law firm (Khunti/Ranchi) for incorporation roadmap
- Print 5,000 pamphlets (Hindi + Nagpuri), 50 wall paintings (₹400 each), 200 driver jackets
- Onboard 30 Sarathis offline (Aadhaar + DL + live photo) before app goes live

KPI → 30 Sarathis verified • 5 walls painted • Law MOU signed

PHASE 1 — PILOT | Khunti Goes Live (The 30-Day Test) (Day 1 → 30)

- Go live on Play Store (Customer + Sarathi) + districtcar.in/landing
- Activate 3 anchor routes only: Khunti↔Sadar Hospital, Khunti↔Hatia (via shared), Khunti↔Haat
- Daily haat camps (Tue/Fri) — live demo + assisted first booking (Saathi helps)
- ASHA didi referral: ₹20 per first hospital ride (tracked by coupon code)
- Wall-to-wall: 2 panchayat announcements/day (mike) + WhatsApp status videos (15 sec, Hindi)
- Night safety: 2 dedicated 'Mahila Sarathis' for hospital runs + SOS drill

KPI → 200 rides • 4.6★ rating • 50% repeat in 14 days • 0 safety incidents

PHASE 2 — CLUSTER | Ranchi Belt Expansion (Proof of Replicability) (Day 31 → 90)

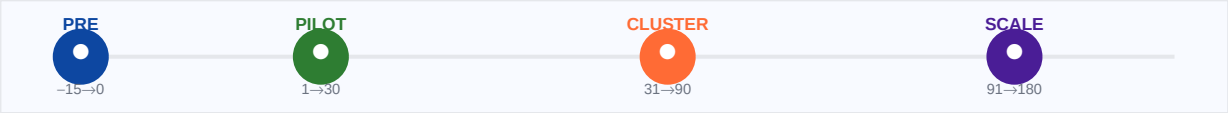

- Replicate playbook in Ranchi Rural (Bundu, Sonahatu), Gumla, Simdega, Lohardaga — one at a time
- Hire 1 Cluster Lead per district (ex-Ola/Uber or local logistics, ₹25k) + 5 Saathis
- Anchor partnerships: 2 Sadar hospitals + 1 railway station + 1 college per district
- Driver referral: ₹300 for Sarathi who brings 2 more verified drivers (after 5 rides each)
- Start Monetag + hospital/garage lead ads (target ₹30k/mo ad revenue by Day 90)

KPI → 8 districts live • 1,200 rides/mo • 800 Sarathis • ₹30k/mo ad rev • CAC < ₹45

PHASE 3 — SCALE | 8 Districts, 15k Rides/Month (Pre-Revenue Scale) (Day 91 → 180)

- Expand to Dhanbad, Bokaro, Jamshedpur, Hazaribagh (supply-first: drivers before marketing)
- Launch 'Round-Trip 35%' + 'Hospital Priority' (free wait 30 min at Sadar) as hero offers
- Incorporate: Pvt Ltd + Startup India + GST + Aggregator filing (law firm delivers)
- Switch to subscription: early Sarathis grandfathered at ₹199/mo for 6 months
- First intercity pilot: Khunti→Ranchi shared (₹180/seat, 4 seats) — test logistics parcel add-on

KPI → 8 districts • 5,000 Sarathis • 1L users • 15k rides/mo • ₹1.2L/mo revenue (ads+subs) • Incorporation done

Visual timeline — each phase gates the next. No Phase 2 without Phase 1 KPIs

08 — DISTRICT PRIORITIZATION

Where to strike first — a weighted score (demand × supply × competition + home base bonus)

District	Pop (L)	Villages	Why Now	Demand	Competition	When
Khunti	6.1	620	No rail, sole road market	HIGH (hospital+haat)	LOW (us!)	★ P0 PILOT
Ranchi Rural	32.1*	1,550	RIMS, Hatia, 4 highways	VERY HIGH	MEDIUM (Ola edge)	P1 (Day 31)
Gumla	11.8	950	Adjacent to Khunti	HIGH	VERY LOW	P1 (Day 45)
Simdega	7.0	680	Tribal, NH143	HIGH	VERY LOW	P1 (Day 60)
Lohardaga	5.4	350	Tiny, controllable	MEDIUM	VERY LOW	P1 (Day 60)
Hazaribagh	19.8	1,480	Medical + coal belt	HIGH	LOW	P2 (Day 90)
Bokaro	22.4	1,210	Steel city spillover	HIGH	MEDIUM	P2 (Day 110)
Jamshedpur	25.3	1,380	Industrial, tourist	HIGH	MEDIUM	P2 (Day 130)

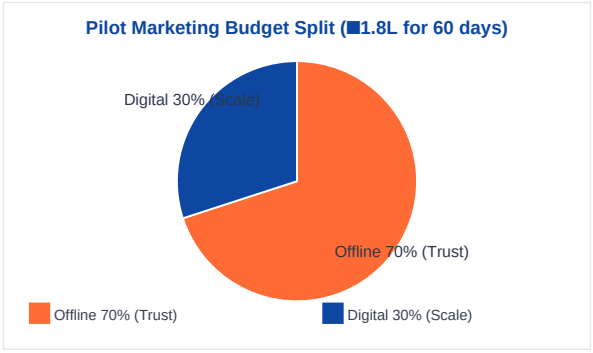

**Ranchi district pop includes urban; rural focus is Bundu/Sonahatu/Tamar blocks (our entry). Gumla/Simdega/Lohardaga are the 'Khunti cluster' — same language (Nagpuri/Sadri), same haat calendar, same driver pool.*

Expansion rule:

Never enter a new district until the previous one has ≥**50 active Sarathis and** ≥**150 rides/week**. This is the **liquidity lock** — without it, wait times kill trust. Khunti must hit **20 rides/day by Day 30** or we fix Khunti, not expand.

09 — MARKETING ENGINE — RURAL-FIRST PLAYBOOK

Offline wins the village. Digital keeps it. 70/30 budget split.

OFFLINE 70% — ₹1.26L

- **Wall paintings (50 × ₹400)** — block HQ + Sadar + haat entry — lasts 12 months
- **Pamphlets 5k (Hindi/Nagpuri)** — haat + panchayat + school gate
- **Haat camps (8 × ₹2k)** — live demo, assisted booking, sweets for kids
- **Auto-stand branding + jackets (50)** — walking billboards
- **Mike announcements + ASHA kits**

DIGITAL 30% — ₹54k

- **WhatsApp Status videos (15 sec)** — Saathi + driver stories, daily
- **Facebook "Khunti Jobs/News" groups** — ₹200/day boost, 8 km radius
- **YouTube Shorts (Nagpuri)** — hospital ride stories
- **Monetag + districtcar.in SEO** — already ranking for "Khunti taxi"

Channel	Cost	Where	Creative / Hook
1. Wall Paintings	■400/wall, 12-mo life	Block HQ, Sadar gate, haat entry, school wall	'Gaon se Zila, ■10/km — Call 87896 01387' + QR
2. Haat Camps	■2k/camp, 8 camps	Tue/Fri haat (Khunti, Torpa, Murhu)	Demo + first ride assisted + toffee for kids; photo for FB
3. ASHA & ANM Network	■20/referral	Sadar Hospital + PHC + Anganwadi	Hospital ride coupon; ASHA didi is most trusted voice
4. Auto-Stand + Jackets	■350/jacket × 50	Khunti stand, Torpa chowk, Ranchi Road	Blue jacket = verified Sarathi; moving trust signal
5. Panchayat Mike	■500/day	2 villages/day rotation	Nagpuri announcement: 'Ab gaadi phone pe' + number
6. WhatsApp + FB Groups	■200/day	Khunti FB groups (40k members)	15-sec video: real driver + real customer (no actors)
7. districtcar.in SEO	■0 (existing)	Google 'Khunti taxi / Ranchi cab'	Already indexed; add blog: 'Sadar ka raasta' series

Creative pillars (all Hindi/Nagpuri, never English-first):

- **Daam Pakka —** '■120 me Sadar' — price on the wall, not in the head. No haggle, no surprise.
- **Driver Apna —** Jacket + name + rating in app. 'Raju da — 4.8★ — 312 rides — Khunti ke hi hain.'
- **Samay Pe —** '15 min me gaadi, nahi to agla ride free' (pilot promise, capped).
- **Mahila Suraksha —** 'Betiyan bhi, raat me bhi' — OTP + share-live-location + SOS (Phase 2).

Referral engine (zero CAC hero): Every rider gets **"Dost ko bhejo — dono ko ■30 hospital coupon"**. Every Sarathi gets **■300 for 2 verified driver referrals** (after 5 rides each). At ■45 effective CAC vs ■180 for FB ads, referrals are 4× cheaper — and rural Jharkhand runs on word-of-mouth. Target: **40% of new users via referral by Day 90**.

Content calendar (first 30 days — daily rhythm):

Day	Offline Action	Digital Action
Mon	Wall painting (new wall)	WhatsApp: Driver story (Raju da)
Tue	HAAT CAMP — Khunti haat	FB post: Camp photos + ride count
Wed	ASHA visit + coupon drop	YouTube Short: 'Sadar kaise pahunche'
Thu	Auto-stand jacket check	WhatsApp: Customer testimonial (audio)
Fri	HAAT CAMP — Torpa haat	FB Live: Haat se ghar tak
Sat	School gate pamphlet (parents)	WhatsApp: Round-trip offer creative
Sun	Rest + data review	Weekly review: rides, rating, wall recall

10 — OPERATIONS & DRIVER SUPPLY

Build the fleet without owning a single vehicle

District Car is **asset-light**: we don't buy cars. We **organize the existing 2,000+ autos/Boleros** already running in Khunti district. Supply strategy is **'recruit** → **verify** → **activate** → **retain'** — each with a checklist.

Stage	Channel	Gate	SLA
Recruit	Saathi + stand visit + referral	Aadhaar + DL + RC + live vehicle photo (camera-only)	Day 1
Verify	Admin panel: photo + docs review	Approve/reject in 24h; jacket + QR sticker issued	Day 1–2
Activate	App training (15 min, Hindi video) + test ride	Online toggle + geohash live; first ride assisted by Saathi	Day 2–3
Retain	Weekly payout summary + rating nudge + fuel partner discount	■300 referral + priority for 4.7★+ drivers (future subs)	Ongoing

Liquidity math (Khunti pilot):

Metric	Day 1–7	Day 8–15	Day 16–30	Why It Matters
Active Sarathis (online 8h)	15	25	40–50	Need 1 driver per 4 km radius for 15-min ETA
Rides / day	5–8	12–15	20–25	20/day = ■3k/day fare flow in Khunti alone
Avg. wait time	<25 min	<18 min	<15 min	>20 min = churn; <15 min = trust

Metric	Day 1–7	Day 8–15	Day 16–30	Why It Matters
Driver earnings / day	₹300–500	₹500–800	₹700–1,000	₹700/day = 1.5× daily wage → stickiness
Cancellation %	<15%	<10%	<8%	Txn-locked assignment prevents race conditions

Each Sarathi aims for **3–5 rides/day** on anchor routes. At ₹150 avg fare × 4 rides = **₹600 gross/day, ₹18k/month** — vs ₹12–15k from stand waiting. Our value is **discovery, not discount**.

Support model (Jharkhand reality): No call centre in Bangalore. **1 WhatsApp number (+91 87896 01387)** + **1 Saathi per 20 drivers** who visits the stand daily. Rural support is **physical, not IVR**.

11 — TECHNOLOGY, TRUST & SAFETY

Light enough for Jio Bharat, strong enough for 10k concurrent rides

Stack	What It Does	Why It Wins Rural
Flutter + Firebase	Single codebase (Customer + Driver + Admin); Firestore + Cloud Functions + FCM; **25-sec transaction-locked driver assignment** prevents double-booking	Auto-scales to 50k users without rewrite
Geospatial	Haversine + geohash, radius expansion 5→10→15 km	Finds nearest Sarathi even in low-density blocks
Camera-only photo	Driver onboarding mandates live camera capture (no gallery upload)	Eliminates fake vehicle photos — critical for rural trust
OTP + Rating	4-digit ride OTP (verify) + 1–5★ aggregation (server-side)	Mother in Gumla sees 4.8★ before boarding — trust in one glance
Monetag + SEO	Push ads (no click-hijack) + districtcar.in structured data (24 districts, JSON-LD)	Ad revenue from Day 1; SEO already ranking for 'Jharkhand taxi'
Safety roadmap	Phase 2: Share-live-location + SOS + night-trip flag + women-driver filter	Addresses #1 barrier for female riders

What we don't do (and why):

- **No surge pricing — ever.** Rural incomes can't absorb it; it destroys trust. Fixed slabs only.
- **No wallet compulsion.** Cash and UPI peer-to-peer; we don't hold money pre-registration.
- **No heavy KYC.** Phone OTP + Aadhaar + DL is enough for pilot; full eKYC post-incorporation.
- **No English-only.** Hindi + Nagpuri voice; icons > text for low-literacy users.

12 — LEGAL & COMPLIANCE ROADMAP

With law-firm partners — from 'no registration' to 'fully compliant aggregator'

Current status (Day 0): Not registered, not collecting platform fees. This is **intentional** — it lets us validate PMF without regulatory overhead. All fares are **peer-to-peer**. The app is a **section 79 IT Act intermediary** (discovery platform), not a transport operator. Monetization is via **advertising (Monetag) — not commission**. This structure is reviewed by our empanelled law firm before any public scale.

When	Action	Deliverable	Cost (est.)
Now → Day 30	MOU with 1–3 law firms (Khunti/Ranchi/Jamshedpur)	Advisory on intermediary vs aggregator; draft ToS + Privacy + driver agreement (peer-to-peer disclosure)	₹25–40k retainer
Day 30–90	Incorporation: Pvt Ltd (MCA) + PAN/TAN + MSME (Udyam)	Name: District Car Mobility Pvt Ltd; objects: IT platform + logistics support	₹35–50k (incl. DSC, DIN)
Day 60–120	Startup India (DPIIT) + GST (if >₹20L turnover) + Trade License (Khunti)	DPIIT benefits: tax holiday, IPR, tenders; GST on platform fees only (post-commission)	₹15–25k
Day 90–150	Transport Aggregator Licence (Jharkhand MV Rules, 2023) — filing	Requires: registered entity + driver verification SOP + fare display + grievance officer; we already have all	₹50k–1L (state fee + legal)
Day 120–180	Insurance + POSH + Data (DPDP Act 2023) compliance	PA cover for Sarathis (bundled ₹10/ride), POSH committee, consent manager for app data	₹30–50k + ₹10/ride
Ongoing	MoUs: Sadar hospitals, railway stations, colleges, fuel partners	Hospital parking slot + station kiosk + college referral desk	Revenue share / barter

What law-firm partners get (and why they should say yes):

- **Retainer + success fee:** Monthly retainer (₹15–25k/firm) + incorporation success fee + 0.5% equity advisory pool (optional, vested over 12 months).
- **Brand association:** 'Legal Partner — District Car, Jharkhand's Rural Mobility' on districtcar.in + pamphlets + jackets — visibility in 24 districts.

- **Deal flow:** First right to handle driver disputes, accident claims, labour matters, and future fundraising (pre-seed/seed).
- **Impact story:** Helping build the first rural mobility platform for 3 crore villagers — a CSR + PR win for the firm.
- **Low risk:** No fare handling in Phase 1 = minimal liability; we carry professional indemnity once registered.

Peer-to-peer disclosure (app + pamphlet): 'District Car is a discovery platform. Fares are agreed and settled directly between rider and driver. District Car does not collect fares, does not operate vehicles, and is not a common carrier. For support, contact +91 87896 01387.' — This line is on every booking screen and every wall painting. Law firms to vet Hindi/Nagpuri translation.

13 — FINANCIAL MODEL & UNIT ECONOMICS

Pilot is frugal. Scale is subscription. Profit is Year 2.

Unit economics (per ride, Khunti pilot — peer-to-peer, so platform P&L; is separate):

Line Item	Amount	Who Gets It	Note
Avg. fare (12 km, Gramin Auto)	₹150	Sarathi (100%)	Peer-to-peer cash/UPI; platform takes ₹0
Fuel (12 km × ₹4/km)	–₹48	—	Auto mileage ~25 km/l; petrol ₹105/l
Driver net / ride	₹102	Sarathi	Before maintenance; 4 rides/day = ₹408/day net
Platform cost / ride	₹6–8	District Car	Firebase + FCM + support amortized (₹6k/mo ÷ 800 rides)
Platform revenue / ride (ads)	₹3–5	District Car	Monetag CPM + banner; scales with MAU
Platform net / ride (Phase 1)	–₹3	—	Intentionally negative; we buy liquidity with ads
Platform net / ride (Phase 2, post-sub)	₹8–12	District Car	₹299/mo ÷ 30 rides = ₹10/ride avg

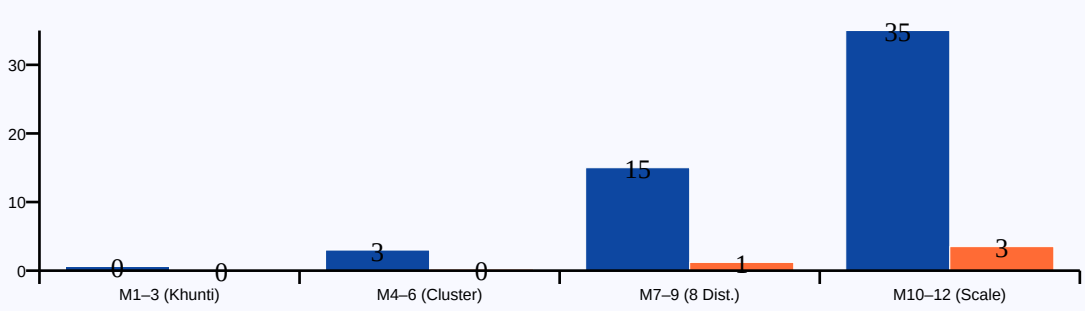

6-month cashflow (conservative — assumes Khunti + 3 cluster districts by Month 6):

Month	Rides	Active Sarathis	Ad Revenue	Sub Revenue	Total Revenue	Costs*	Net
M1 (Khunti)	600	45	₹8k	₹0	₹8k	₹65k	–₹57k
M2	1,200	90	₹14k	₹2k	₹16k	₹72k	–₹56k
M3 (+Gumla/Simdega)	3,000	220	₹28k	₹8k	₹36k	₹95k	–₹59k
M4	6,000	450	₹45k	₹22k	₹67k	₹110k	–₹43k
M5	10,000	800	₹68k	₹45k	₹1.13L	₹135k	–₹22k
M6 (8 dist.)	15,000	1,200	₹85k	₹78k	₹1.63L	₹155k	+₹8k

Costs: Firebase (~₹5k) + Saathi stipends + wall/pamphlet + jackets + legal retainer + fuel for ops. Founder salary = ₹0 till Month 6. Break-even ~Month 6 at 15k rides.

Runway math: ₹8–12L covers 6 months to break-even (incl. 20% buffer). Sources: Founder ₹3L + Friends/Family ₹3–5L + Monetag + early subs. **No VC needed for pilot.** Seed (₹1–1.5 Cr) only after 15k rides/mo and incorporation — at 8–10× better valuation.

14 — 12-MONTH GROWTH PROJECTIONS

Conservative: assumes 25% MoM growth post-PMF (Month 4). Aggressive (not shown) = 35% MoM → 55k rides/mo by M12.

Phase	Footprint	Rides/mo	Sarathis	Users (cum.)	Revenue/mo
M1–3	Khunti pilot	600→3k/mo	45→220	1k→4k	₹8k→36k
M4–6	+3 cluster dist.	6k→15k/mo	450→1,200	8k→22k	₹67k→1.63L
M7–9	8 districts	22k→28k/mo	1,800→2,800	35k→55k	₹2.8L→3.9L
M10–12	Intercity + parcel	32k→35k/mo	3,200→3,800	70k→90k	₹4.5L→5.8L

Phase	Footprint	Rides/mo	Sarathis	Users (cum.)	Revenue/mo
Year 1 Total	—	~2,10,000 rides	3,800 supply	90k registered	■28–32L revenue

Year 2 (with commission/sub at scale): 12k rides/day × ■160 avg fare × 10% take = **■5.7 Cr annual fare flow; ■57L platform revenue** (plus ads + logistics). Path to profitability is subscription + ads, not surge.

North Star (M12): 90k registered riders, 3,800 active Sarathis, 35k rides/mo, 4.6★, <12 min wait, 8 districts, incorporation + aggregator licence done. Everything else is vanity.

15 — RISK REGISTER & MITIGATION

Risk	Level	Mitigation
Low driver density → long waits → churn	HIGH	Liquidity lock: don't enter district till 50 Sarathis; 5→10→15 km radius expansion; round-trip 35% to reduce empty km
Cash peer-to-peer → disputes	MED	Fare shown pre-booking (server-side) + in-app fare slip + rating penalty for overcharging; law-firm vetted ToS
Pre-registration liability	HIGH	MOU with law firm Day 0; peer-to-peer disclosure on every screen; no platform fare handling; PI insurance Day 90
Monsoon + bad roads → cancellations	MED	Rain surcharge ■10 (goes 100% to driver, not platform) + 'rain-ready' Bolero tagging + 4WD flag
Copycat (local player)	LOW (now) → MED (M9)	Moat: driver graph + hospital MoUs + wall inventory + referral lock (40% users via referral)
Low digital literacy	MED	Hindi + icons + Saathi-assisted first booking + mike + wall (not FB ads); IVR booking roadmap (missed call → callback)
Safety incident (esp. women)	HIGH	OTP + live photo + share-location + SOS + women-driver filter (Phase 2) + 24h grievance SLA; 0 tolerance + deactivation

Non-negotiables:

- **No ride without OTP verification.** No exceptions.
- **No district without 50 Sarathis.** No exceptions.
- **No surge, no hidden fee.** What you see is what you pay — or the ride is free (pilot).

16 — KPIs, DASHBOARD & REVIEW CADENCE

What we measure daily, weekly, monthly — and who owns it

KPI	Target	Cadence	Owner
Rides / day	20 (Khunti M1) → 500 (M6)	Daily	Cluster Lead
Avg. wait (min)	<15	Daily	Ops
Active Sarathis (8h online)	50 (Khunti) → 1,200 (M6)	Daily	Saathi Captain
Repeat rate (14d)	>40%	Weekly	Marketing Head
Rating (avg)	>4.6★	Daily	Support
Cancellation %	<8%	Daily	Tech + Ops
CAC (blended)	<■45	Weekly	Marketing
Referral share	>40% of new users	Weekly	Marketing
Ad revenue / mo	■85k (M6)	Monthly	Monetization
Incorporation	Done by M5	Milestone	Law firm

Review rhythm:

- **Daily (15 min, 9 AM):** Yesterday's rides, wait time, cancellations, driver online % — WhatsApp group (Founder + Cluster Leads + Saathi Captains).
- **Weekly (60 min, Sunday 10 AM):** Funnel (impressions → installs → first ride → repeat), wall recall, haat camp ROI, referral %, rating dip — at Khunti office (or Google Meet).
- **Monthly (half-day, last Saturday):** P&L;, district scorecard, legal milestone, 30-60-90 plan, hiring — with law-firm partner present.

Dashboard (Admin Panel): Real-time KPI cards + active trips + gross fare flow + pending verifications + rate cards — all in the Flutter Web panel already built. No Excel. One screen, one truth.

17 — TEAM, HIRING & CULTURE

Role	Owns	When	Cost
Founder / CEO	Owns vision, law-firm & district relationships, fundraising	Day 0	—
Marketing Head (You)	GTM, brand, Saathi network, content, partnerships	Day 0	—
Cluster Lead × 4	1 per 2 districts; owns rides, wait time, driver supply	Day 30→120	₹25k/mo + ride bonus
District Saathi × 20	Village youth; wall, haat, ASHA, assisted booking	Day –15→	₹500/day (camp days) + referral
Tech (Flutter+Firebase) × 1	App stability, OTP, geohash, admin panel	Day 0 (existing)	—
Support (WhatsApp) × 2	87896 01387 — Hindi/Nagpuri, 8 AM–10 PM	Day 15	₹15k/mo
Law Firm Partners × 3	Khunti/Ranchi/Jamshedpur — incorporation + compliance	Day 0	Retainer + success + 0.5% pool

Culture code (rural Jharkhand demands it):

- **Gaon pehle (Village first):** If a feature doesn't help a Torpa farmer reach Sadar by 9 AM, we don't build it.
- **Daam pe khare (Stand by the price):** No surge, no haggle, no surprise — even if we lose a ride.
- **Saathi, not staff:** Drivers are partners (Sarathi), not supply. Villagers are neighbours, not users.
- **Dikhta hai to bikta hai (Seen is sold):** Wall > Reel. Haat > Hashtag. Physical > digital till 10k rides.

18 — THE ASK & NEXT STEPS

What we need in the next 15 days — and what you get

We Need	Where/Who	What Happens	What You Get
3 Law-Firm Partners	Khunti, Ranchi, Jamshedpur	MOU + ToS/Privacy + driver agreement (peer-to-peer) + incorporation roadmap	Retainer ₹15–25k/mo + success fee + 0.5% advisory pool (optional) + brand on 24-district network
50 Sarathi Drivers	Khunti + Torpa + Murhu	Verified + jacket + QR + app training; 100% fare to them	₹0 commission + discovery + 3–5 rides/day + future priority + insurance (Phase 2)
10 Village Saathis	Youth (18–28, bike + phone)	Wall + haat + ASHA + assisted booking	₹500/camp day + ₹20/referral + District Car ID card + future Cluster Lead path
₹8–12L Pilot Runway	Founder + F&F; + ad rev	6 months to break-even (see cashflow); no VC needed yet	If you're an angel: 8–12% for ₹12–20L (post-pilot valuation 8–10× higher)
2 Hospital + 1 Station MoU	Sadar Khunti + 1 PHC + Hatia/Khunti stand	Parking slot + referral desk + coupon	Hospital gets reliable patient transport; station gets last-mile

Next 15 days — action calendar:

When	Action
Day 1–3	Sign law-firm MOU (Khunti) + finalize ToS/Privacy (Hindi) + print pamphlets
Day 4–7	Paint 15 walls (Khunti block) + onboard 15 Sarathis + train 5 Saathis
Day 8–10	Soft launch: 3 anchor routes live + first haat camp (Khunti Tue haat)
Day 11–15	First 50 rides + ASHA coupons + wall recall survey + weekly review #1
Day 15	GO / NO-GO for Torpa expansion — needs 20 rides/day in Khunti

Closing — from the Marketing Head:

"Jharkhand doesn't need another city cab app. It needs a **gaon ka app** that understands a haat day, a Sadar OPD queue, and a father who wants his daughter to reach college safely. We have the apps. We have the home base. We have the wall space. What we need now is **discipline** — 30 days in Khunti, 50 Sarathis, 20 rides a day. If we win Khunti, we can win Jharkhand.

This plan is not a deck — it's a **daily checklist**. Print it. Pin it on the Khunti office wall. Tick one box every day. Let's make **'Gaon se Zila tak, gaadi tay hai'** the most trusted line in rural Jharkhand."

APPENDIX

A. Key Data Sources

- Census of India 2011 — District & village population; ST share; literacy (censusindia.gov.in)
- Jharkhand Economic Survey 2023-24 — Per-capita income, road density, health indicators (jharkhand.gov.in)
- TRAI Performance Indicator Report 2024 — Telecom & smartphone penetration (trai.gov.in)
- MoRTH Annual Report 2023-24 — NH length, PMGSY rural connectivity (morth.nic.in)
- NITI Aayog — Aspirational Districts & Health Index; SRS Bulletin — MMR/IMR
- UDISE+ 2023-24 — School dropout & conveyance data (udiseplus.gov.in)
- NABARD All-India Rural Financial Inclusion Survey 2023 — Rural income
- LGD (Local Government Directory) + Panchayati Raj Dept, Jharkhand — GP & village counts (lgdirectory.gov.in)

B. Rate Card (to print on pamphlet back)

Service	Base	Per km	Min	Round-Trip	Example 10 km
Gramin Auto	■30	■10	■60	–35% return	■130 → ■84 return
Mini Car	■50	■14	■90	–35% return	■190 → ■123 return
Sedan/SUV	■70	■18	■120	–35% return	■250 → ■162 return

No surge. No hidden fee. Fare shown before booking. Server-computed (Haversine). Cash or UPI peer-to-peer.
